DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

> A person shall be entitled to a patent unless –
>
> (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
>
> (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 3-5 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,469,615 (Yamazaki).

Yamakazi discloses, referring primarily to figures 1-4b, a component for making connections in a microelectronic assembly (50) comprising: (a) a dielectric layer (13) having first and second surfaces; a plurality of elongated conductors (12) on said first surface; and (c) slots (14) in said dielectric layer extending through the dielectric layer under said conductors from said first surface to said second surface, said slots extending in the direction of elongation of said conductors [claim 1], wherein at least one of the slots is empty (figure 4a) [claim 3], wherein at least one of the slots is devoid of conductive material (figure 4a) [claim 4], wherein the dielectric layer is solid dielectric [claim 5].

Claims 1, 2, and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by US 6,523,252 B1 (Lipponen).

Lipponen discloses, referring primarily to figure 8, a component for making connections in a microelectronic assembly (M) comprising: (a) a dielectric layer (3a) having first and second surfaces; a plurality of elongated conductors (1b, 1g, 1h) on said first surface; and (c) slots (4a-c) in said dielectric layer extending through the dielectric layer under said conductors from said first surface to said second surface, said slots extending in the direction of elongation of said conductors [claim 1], further comprising a dispersible conductive material (col. 8, lines 25-30) disposed in said slots [claim 2], wherein the dielectric layer is solid dielectric (col. 7, lines 20-30) [claim 5].

Response to Arguments

Applicant's arguments with respect to claims 1-5 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following documents disclose dielectric layers having slots:

US 5,214,571 Dahlgren et al.,

US 6,713,685 B1 Cotton.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
